ABOUT NATIONAL CONFERENCE

The National Conference on Recent Advances in Drug Discovery & Development was organized to discuss the current challenges and new opportunities in pharmaceutical research. With the increasing emergence of new diseases, antimicrobial resistance, and the growing need for safer and more effective medicines, drug discovery has become a crucial area of scientific focus.

The conference aimed to promote collaboration between academic institutions and the pharmaceutical industry, in line with the theme.

“Fostering Synergy: Transforming Academic Research into Industrial Drug Development.” It highlights the importance of translating research findings from academic laboratories into practical applications and commercially viable medicines.

The purpose of the conference was to provide a platform for researchers, academicians, and students to share knowledge, exchange ideas, and learn about the latest advancements in drug discovery and pharmaceutical development. The conference also encouraged scientific interaction, research collaboration, and professional networking while helping participants understand the overall process of drug development from discovery to commercialization.
